

# Multi-Asset Risk Strategy (MARS) ETF Portfolio

## Investment Objective & Strategy

Astoria's Multi-Asset Risk Strategy (MARS) ETF Portfolio will maintain approximately 45%-55% in equities, 25%-35% in fixed income, and 15%-25% in alternatives.

Our benchmark is 50% MSCI All Country World Index (NDUEACWF), 30% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU), and 20% Wilshire Liquid Alternative Multi-Strategy Index (WLIQAMST). There is generally one or two strategic rebalances per year assuming normal market conditions.

## Asset Allocation

## Risk Profile

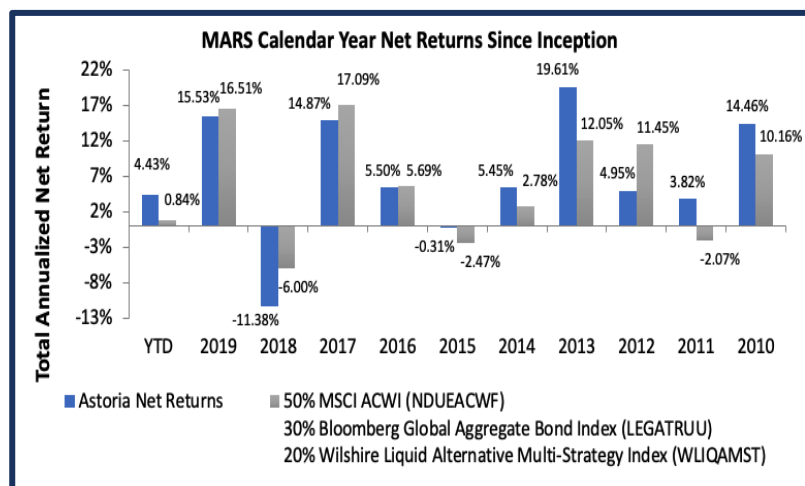

The MARS ETF Portfolio is typically utilized by investors with a very high risk tolerance that are solving for long term growth.

1. Key Portfolio Statistics are calculated by Astoria Portfolio Advisors, Orion, and Vanguard.com. Standard Deviation, Beta, and Sharpe Ratio are calculated using data from January 31, 2010 to July 31, 2020. The Standard Deviation and Sharpe Ratio statistics over the prevailing time period for our benchmark are 8.64% and 0.55 respectively. The Duration and Dividend Yield are based on data as of July 31, 2020.

2-3. Data Source: Astoria Portfolio Advisors and Orion. Data as of July 31, 2020. YTD numbers are not annualized. All other numbers are annualized. Net Returns incorporate 50bps annualized management fee. The benchmark for the Multi-Asset Risk Strategy is 50% MSCI All Country World Index (NDUEACWF), 30% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU), and 20% Wilshire Liquid Alternative Multi-Strategy Index (WLIQAMST). Since inception refers to January 2010.

### Warranties & Disclaimers

There are no warranties implied. Astoria Portfolio Advisors LLC is a registered investment adviser located in New York. Astoria Portfolio Advisors LLC may only transact business in those states in which it is registered or qualifies for an exemption or exclusion from registration requirements.

Information presented herein is for educational purposes only and does not intend to make an offer or solicitation for the sale or purchase of any specific securities, investments, or investment strategies. Investments involve risk and unless otherwise stated, are not guaranteed. Readers of the information contained on this Performance Summary, should be aware that any action taken by the viewer/reader based on this information is taken at their own risk. This information does not address individual situations and should not be construed or viewed as any typed of individual or group recommendation. The model delivery performance shown represents only the results of Astoria Portfolio Advisors model portfolios for the relevant time period and do not represent the results of actual trading of investor assets unless otherwise indicated. Model portfolio performance is the result of the application of the Astoria Portfolio Advisors proprietary investment process. Model performance has inherent limitations. The results are theoretical and do not reflect any investor's actual experience with owning, trading or managing an actual investment account. Thus, the performance shown does not reflect the impact that material economic and market factors had or might have had on decision making if actual investor money had been managed. Indices are typically not available for direct investment, are unmanaged, and do not incur fees or expenses.

The Company's track record for the Multi-Asset Risk Strategy prior to June 9, 2017 includes the performance record established by the Portfolio Manager while affiliated with a prior firm. Astoria's Multi-Asset Risk Strategy performance is shown net of advisory fee of 0.50% charged by Astoria Portfolio Advisors and reflects the deduction of trading costs. The model delivery performance results are net of Astoria Portfolio Advisors' fee and does not include any additional advisory fees charged by advisors employing Astoria's models. Any additional fees charged by an advisor will reduce an investor's return. Performance results shown include the reinvestment of dividends and interest on cash balances where applicable. The data used to calculate the model performance was obtained from sources deemed reliable and then organized and presented by Astoria Portfolio Advisors. The performance calculations have not been audited by any third party. Actual performance of client portfolios may differ materially due to the timing related to additional client deposits or withdrawals and the actual deployment and investment of a client portfolio, the reinvestment of dividends, the length of time various positions are held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio.

**Benchmark:** The Multi-Asset Risk Strategy performance results shown are compared to the performance of 50% MSCI All Country World Index (NDUEACWF), 30% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU), and 20% Wilshire Liquid Alternative Multi-Strategy Index (WLIQAMST). The index results do not reflect fees and expenses and you typically cannot invest in an index. **Return Comparison:** Both the MSCI All Country World Index and the Bloomberg Global Aggregate Bond indices were chosen as they are generally well recognized as an indicator or representation of the stock and bond market and include a cross section of holdings. Also, the Wilshire Liquid Alternative Multi-Strategy Index was chosen as it is generally well recognized as an indicator or representation of liquid alternative holdings. Indices are typically not available for direct investment, are unmanaged and do not incur fees or expenses. The results do not represent actual trading and actual results may significantly differ from the theoretical results presented.
